- **Proficient:**
  - Java, Python, C, Bash
  - VS Code, IntelliJ IDEA
- **Exposure:**
  - Version Control, Github
  - JavaScript, HTML, CSS
  - Google Cloud Platform
  - Data Structures and Algorithms
  - Object Oriented Design

PROJECT WORK

Performance Tracker   Jun'21

A web application that tracks all performance metrics for all employees on a team. Categorized by task done and time taken.
Technologies utilized:
- HTML5, Bootstrap 5, CSS3
- Python, Django, SQLite Database, i18n
- Google Cloud Platform

Project specifications
- Allow unique user login to the server
- Fully translated in English and Spanish
- Admin dashboard to view all data, and ability to filter by date.

Covid-19 Case Updates   Feb'21

A web application that updates with the latest reported cases and deaths in the last 24 hours.
Technologies utilized:
- HTML5, Bootstrap 4, CSS3
- Java, SpringBoot 2, Maven, H2 Database, Thymeleaf

Project specifications:
- Parses daily covid reports, and organizes the data into an easily consumable format
- Displays total cases all time, as well as total cases reported in the last 24 hours.
- Uses cron jobs to automatically update the latest reported cases daily.

EXPERIENCE

- **Stock Associate** | Under Armour | Nov '14 - Present

Developed the Performance Tracker web app which could save around 20+ hours of payroll per week.
